

Avirup Banik

Full Stack Web Developer

Hi I am a full stack developer with a strong focus on React. With 6+ months of experience in the industry and a passion for building intuitive and user-friendly web applications. My expertise in React allows me to create highly efficient and scalable front-ends, while my full stack skills give me the ability to also handle the back-end development and integration with APIs and databases. I believe my combination of technical skills and passion make me a valuable asset to any team.

WORK EXPERIENCE

Full Stack Web Developer Symlink Technologies LLP

08/2022 - Present

Work Description

- Help build and deploy a full-stack web application using the MERN stack, including the integration of a RESTful API and a MongoDB database.
- Contributed to the development of a MERN stack-based social media platform, including the implementation of various features such as user authentication using JWT and real-time messaging using socket.io
- Contributed to the development of a custom CMS using the MERN stack, enabling non-technical users to easily manage and update the content of their website.
- Implemented a highly performant and scalable front-end solution using React.
- Improved the user experience of an existing application by refactoring the front-end using React and implementing new features such as pagination and filtering.
- Worked with a team to migrate an application to a modern stack using React and Redux, improving the overall performance and maintainability of the application.
- Developed a series of reusable, responsive React components that were used across multiple projects, improving the consistency and usability of the user interface.
- Contributed to the development of a React-based e-commerce platform, including the implementation of various npm packages and integrations with external APIs.
- Utilized React Query to optimize performance and reduce network requests.
- Integrated payment gateway using webhook in both end.
